

# DISINFECT & DEODORIZE

## Gear, Equipment & Facilities

### Baseball/Softball Disinfecting Tips

To keep protected from infections and kill odors follow a cleaning routine before, during and after each practice or game.

#### Step 1

Remove any dirt or debris from equipment. Take apart equipment, pads and undo straps, etc. Inspect equipment to ensure in good working order with no damage.

#### Step 2

Thoroughly spray Clear Gear on all parts of the equipment (inside and out) ensuring that all surfaces touched or shared are sprayed.

- **Gloves, blockers, catch gloves:** Apply 3-4 sprays inside gloves and blockers.
- **Cleats:** Apply 3-4 sprays inside cleats, making sure to spray the tongue and walls of the boot.
- **Helmets, chin straps, and cages:** Spray liberally inside the helmet (3-5 sprays) with special attention to the forehead area and chin straps. Spray the crown of the helmet and in the crevices to prohibit the growth of mold, mildew, and odor-causing bacteria.
- **Pads and chest protectors:** Spray the inside of the pads that come in contact with skin.
- **Equipment bags:** Periodically empty the bag of all equipment and contents, and spray liberally inside the bag.

#### Step 3

After treating with Clear Gear, hang equipment in a well-ventilated area and allow to fully air dry. Avoid storing gear in damp, musty environments, which increases the growth of bacteria, mold, mildew, and odor. Once fully dry, store in a closet, locker, equipment bag.

#### Step 4

Remove uniform or practice clothing from athlete. Spray clothing and let remain wet for 10 minutes. Then machine wash. Once dried the clothing is ready to wear.

CLEAR GEAR kills 99.9% of germs such as

- Staph/MRSA
- Strep
- Hepatitis B
- Hepatitis C
- Norovirus
- Athletes Foot
- Influenza A/H1N1
- Ringworm
