

DISINFECT & DEODORIZE

Hockey

Disinfecting Tips

To keep protected from infections and kill odors follow a cleaning routine before, during and after each practice or game.

Step 1

Remove any dirt or debris from equipment. Take apart equipment, pads and undo straps, etc. Inspect equipment to ensure in good working order with no damage.

Step 2

Thoroughly spray Clear Gear on all parts of the equipment (inside and out) ensuring that all surfaces touched or shared are sprayed.

- **Gloves, blockers, catch gloves:** Apply 3-4 sprays inside the gloves and blockers. Allow to fully "air dry."
- **Skates:** Apply 3-4 sprays inside the skate, making sure to spray the tongue and walls of the boot. Allow to fully air dry.
- **Helmets, chin straps, and cages:** Spray liberally inside the helmet (3-5 sprays) with special attention to the forehead area and chin straps. Spray the crown of the helmet and in the crevices to prohibit the growth of mold, mildew, and odor-causing bacteria.
- **Elbow pads, shin pads, goalie chest protectors:** Spray liberally on the inside of the pads that come in contact with the player's body. Allow to fully air dry.
- **Equipment bags:** Periodically empty the bag of all equipment and contents, and spray liberally inside the bag.

Step 3

After treating with Clear Gear Spray, hang or store equipment in a well-ventilated area and allow to fully air dry. Avoid storing gear in damp, musty environments, which increases the growth of bacteria, mold, mildew, and odor.

NOTE: Hockey gear and equipment that has never been disinfected or deodorized and is very odorous may need several treatments with Clear Gear Spray to reduce odors. Use Clear Gear Spray from the start with new gear and equipment to prevent bacteria growth and odors.

CLEAR GEAR kills 99.9% of germs such as:

- Staph/MRSA
- Strep
- Hepatitis B
- Hepatitis C
- Norovirus
- Athletes Foot
- Influenza A/H1N1
- Ringworm
- Herpes
- Impetigo
- Coronavirus/ COVID-19*

AND MORE!**

*Clear Gear has demonstrated effectiveness against viruses similar to 2019 Novel Coronavirus (COVID-19 virus) on hard, non-porous surfaces. Therefore, Clear Gear can be used against 2019 Novel Coronavirus (COVID-19 virus) when used in accordance with the directions for use against norovirus on hard, non-porous surfaces.
