

DISINFECT & DEODORIZE

Soccer

Disinfecting Tips

To keep protected from infections and kill odors follow a cleaning routine before, during and after each practice or game.

Step 1

Remove any dirt or debris from equipment. Take apart equipment, pads and undo straps, etc. Inspect equipment to ensure in good working order with no damage.

Step 2

Thoroughly spray Clear Gear on all parts of the equipment (inside and out) ensuring that all surfaces touched or shared are sprayed.

- **Shinguards:** Spray liberally on both the porous underside of the pads as well as the hard caps.
- **Cleats:** If possible, remove the soles. Spray both sides of the sole as well as the inside of the shoes.
- **Goalie gloves & jersey:** Spray outside and inside of gloves and jersey and hang to dry.
- **Equipment bags:** periodically empty the bag of all equipment and contents, and spray liberally inside the bag.

Step 3

After treating with Clear Gear Spray, hang or store equipment in a well-ventilated area and allow to fully air dry. Avoid storing gear in damp, musty environments, which increases the growth of bacteria, mold, mildew, and odor.

NOTE: Soccer gear and equipment that has never been disinfected or deodorized and is very odorous may need several treatments with Clear Gear Spray to reduce odors. Use Clear Gear Spray from the start with new gear and equipment to prevent bacteria growth and odors.

CLEAR GEAR kills 99.9% of germs such as:

- Staph/MRSA
- Strep
- Hepatitis B
- Hepatitis C
- Norovirus
- Athletes Foot
- Influenza A/H1N1
- Ringworm
